

Launch your own (no worries, we'll help you) online virtual school with up to 10 of your teachers trained to create 10 online classes in their subject areas within 10 weeks for only \$10,000. We call it the PLB **All for 10 & 10 for All™** virtual school jump-start program™ to:

- Keep students.
- Retain funding.
- Increase enrollments.
- Use your current staff.
- Offer more courses.
- Keep schools open.

We are K-12 educators and online learning experts who have

developed a model to bring your school system into the "virtual school" world. At PLB we recognize that you and your staff already are experts in operating schools and teaching children successfully. **We can create an online school, host it for the first year and empower your teachers to turn their classes into online courses and teach online.**

### **Accommodating All Learners™**

In this research-based course, strategies, resources and tools for teaching and reaching all students whether online or in the classroom are shared. Teachers engage with content while gaining insight into both their learning and teaching preferences as well as the learning styles of their students.

### **Introduction to Technology for Teachers™**

This interactive course introduces teachers to technology tools with one goal in mind: increasing teacher comfort level in using the Internet and today's technology tools for teaching and learning. Teachers will learn new ways of using tools they are familiar with and be exposed to brand-new tools and applications for use both in professional development and with students.

### **Using Your Moodle I: Creating an Online Classroom™**

This course gives teachers the foundational understanding needed to build their first (or fourth) Moodle-based class. Teachers will understand the basic Moodle classroom tools and some of the advanced options needed to build an interactive online course.

### **Web Technology for Teachers™**

Teachers learn how to use exciting web-based tools to enhance their instruction and transform their classroom into a true 21st Century learning environment. Teachers explore tools such as blogs, wikis, and social bookmarking (to name just a few) in a quest to understand how the internet is changing the lives of students and teachers alike. At the end of the course teachers will be able to use these tools in their classroom.
